

2015-02 Basic **CURTAIN**
FREESTYLE

Freestyle from the DREAM Curtain line, is a panel of translucent fabric strips that overlap at the top and free-float their way down. Its unique structure allows easy passage even while providing a charming screen, bringing a look of freshness and grace wherever it hangs. As this design celebrates light and space in a wonderful way, it is best used in a setting which offers enough of both.

Offering the maximum flexibility of function: as window decoration for any kind of large and small windows, door curtain, a room divider and other applications.

You can select from 24 colors, 2 textures - Classic smooth and Luminare pleated - and unlimited combinations. A Freestyle comes in **heights** of 35-320cm* for a Classic and 100-320cm* for a Luminare. Height refers to the total height from the top of the curtain to the tip of the strips. Although all **widths** are possible, Freestyles widths above 220cm come in two or more detachable parts.

Suitable for any type of curtain rod or panel track, Freestyle is easy to install due to its concealed Rod pocket (C- Head) that opens along the width of the curtain. This C-head can also be used as a base to sew on special curtain tapes.

Washable at 30°, Freestyle normally does not require ironing.

Each DREAM is custom-made and certified for quality.

The standard delivery time is normally 12-18 business days.

Texture Luminare pleated

Texture Classic smooth
