TABLE , from the **DREAM** Room Art collection,
comes as a stylishly practical complement to fine dining.

A DREAM TABLE is a panel of free-falling, translucent strips that skim the floor lightly. This running panel is attached along the outer sides of a table to form a table-skirt.

With its open structure the DREAM Table allows maximum mobility for limbs, also reducing the risk of mishaps caused by the feet snagging the hems of long table cloths. As wrap-around table skirts they are suitable for all standard table sizes and shapes

DREAM TABLEs are made for a wide array of :

Styles: Pick from a standard selection of 14 colors. Customized orders get the option of 24 colors and 2 textures, any combination and sequence.

Sizes: 74cm (standard) height and the possibility for any width as required. Special measures can be made as customized orders. For special requirements in size, form and design, refer to Multistyle
