

## Textures and Strips

### The 2 different textures in DREAM

The DREAM strips come in two qualities- Classic -smooth and Luminare-pleated. These two textures are available across the range of DREAM products.

#### Classic:

The DREAM with its smooth, matt finish is called a Classic . The Classic texture lends a transparence and vivacity to colors, creating a luminous watercolor effect when there is sufficient light. When different strip colors are used, they merge seamlessly into each other, making tantalizing new colors. The Classic texture can be found in both the DREAM Color- ranges - KALEIDO and ROYAL. The KALEIDO range with a quality designed for resilience, offers a selection of 14 CLASSIC colors. The ROYAL range showcases 10 exclusive CLASSIC colors.

#### Luminare:

The DREAM with its crimped, pleated finish is called a LUMINARE The Luminare texture accentuates colors, despite its translucency. Its abstract pattern of tucks and pleats diffuses light, making it a perfect texture for muted settings. The Luminare texture can be found in the DREAM Color- range KALEIDO where it is offered in 14 colors corresponding to the 14 CLASSIC colors. A Luminare Dream is 20% higher in price per sqm to a Classic Dream.

### The different strip-widths in DREAM

The different widths of DREAM strips are maintained in proportion to their lengths and textures to preserve visual balance. The standard DREAM strip-widths are always the average measure .The actual width of a strip may vary by 1-2cms, more or less.

for **CURTAIN** :

10cm is the width for Classic strips with 35-75cm height

14cm is the standard width for Classic strips strips above 76cm height.

20cm is the standard width for all Luminare pleated strips.

In Multistyle are variable Strip-widths.

for **TABLE**

The standard width of the strips is 20cm.

for **LIGHT**

The width of strips differs in each model:

**lotus** 10 cm for both layers, Luminare & Classic

**pure** 10 cm for the single layer of Luminare

**avera** 20cm for the single layer of Luminare

**ombre** 10 & 14cm for the 3 layers of Classic

**zephyr** 20cm for the single layer of Luminare
